MARTHA DEERING WILDLIFE MANAGEMENT AREA  
(MILLBURY & GRAFTON)

- Size: 182 acres.
- Vegetation: Most of the upland area's vegetation is comprised of mixed-hardwoods. There are also a few small open fields. Throughout the low areas are wooded wetlands containing mostly buttonbush and red maple.
- Water: Wooded wetlands and intermittent streams are the area's sole water source. These seeps form the headwaters that feed Cronin Brook, located to the south.
- Wildlife: Deer, coyote, fisher, ruffed grouse, gray fox, turkey, and numerous nongame species. Pheasants are not stocked within this area. A local scout troupe maintains a nest box trail for cavity nesting birds and bats.
- Special Regs: Abandoned buildings are posted to prohibit trespass.
